

The conference will bring together clinicians and researchers to present and discuss approaches and future directions for translating science to therapy for hereditary conditions that affect skin, eyes, hair and teeth.

Our goal is to advance our ability to better manage these conditions through the development of novel and effective diagnostics and therapies.

KEYNOTE SPEAKERS

Sarah Millar, PhD

George Cotsarelis, MD

M. Peter Marinkovich, MD

Michele de Luca, MD

CONFERENCE TOPICS TO ADVANCE ECTODERMAL TISSUE THERAPIES:

Advanced Diagnostics

Bioinformatics

Tissue Engineering

Gene Therapy

Tissue Regeneration and Wound Healing

Ectodermal Appendage Development

DATE & LOCATION:

October 21-24, 2021

Charlotte, NC – Embassy Suites Charlotte

Hybrid meeting with the keynote speakers and critical researchers/clinicians present on site with others invited to participate virtually.

PARTICIPANTS:

Internationally recognized clinicians and researchers with expertise in developing and applying novel treatments for skin, hair, teeth and eyes.

You can find more information, register or apply for a travel grant at

<https://www.nfed.org/research/scientific-conferences/>

REGISTRATION:

On-site and virtual registration will be limited

Deadline for Registration: September 21st, 2021

TRAVEL GRANT OPPORTUNITY:

Early career investigators are invited to submit abstracts. Eight of these investigators will be selected to receive a \$1,000 travel grant to attend the meeting and present their work.

Early career investigators are defined as:

- Postdoctoral Fellows
- Graduate Students
- Junior Faculty (less than 10 years from obtaining terminal degree)
