

Dear friend,

I know you care about making a difference in the lives of others. That's why I'm reaching out to share a story that will touch your heart. This story is one of many connected to the National Foundation for Ectodermal Dysplasias, which I personally support.

Meet Joshua, a remarkable young man who has defied all odds. Born with a rare condition called ectodermal dysplasia, Joshua faced countless challenges from the very beginning. Despite his fragile health and numerous surgeries, he has emerged as a beacon of hope and resilience.

Imagine the uncertainty and fear Joshua's family must have felt, not knowing what the future held for their child. It was the National Foundation for Ectodermal Dysplasias (NFED) that provided them with the support and guidance they desperately needed.

Today, Joshua is a thriving 15-year-old who inspires us all. He's a swimmer, an adventurer, and a beloved friend. But there are many other children and adults like Joshua who still need our help.

By donating to NFED, you'll be directly impacting the lives of individuals affected by ectodermal dysplasias. Your generous gift will provide essential resources, support, and a sense of community to those who need it most.

Together, we can make a profound difference. I invite you to make a donation in any amount. You can help change the lives and futures of all those living with the over 50 types of ectodermal dysplasias.

I am sending this to you because I know you care about people like I do!
